**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-9 and 21-28 are drawn to a system for broadcasting information from a headend to a client, classified in class 725, subclass 98.

II. Claims <sup>10-20 29-30</sup>~~20-26~~ and ~~45-51~~ are drawn to a receiver for receiving broadcast information, classified in class 725, subclass 100.

III. Claims <sup>31-38</sup>~~52-69~~ are drawn to receiver for delivering broadcast data from a headend, classified in class 725, subclass 151.

2. The inventions are distinct, each from the other because:

Inventions I through III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I has separate utility such as cable television programming delivery system for providing television channels to a viewer at the customer premise. See MPEP § 806.05(d).

Invention II has separate utility such as a set-top box for use in a TV network. See MPEP § 806.05(d).

Invention III has separate utility such as a STB for use in a TV network, which can receive multiple channels simultaneously. See MPEP § 806.05(d).

Art Unit: 2611

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for reexamination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
